Just an update. It may have to wait until the following week. We are being advised to work from home unless absolutely crucial the week of the inauguration, based on reports of potential protests at government buildings.

I apologize I didn't fully digest your email and yes I would appreciate seeing if someone could find the copy in your office files. If not let me know what I can do on my end to try and dig it up.

Thanks,

Michelle

Michelle,

Below is a screen shot of what we have in our database for the Circle Ridge Tank Battery's registration. It says we received the registration on 12/27/2013, so potentially it is reflecting an update if you think an original registration was submitted in February 2013? I'm not seeing that we have a scanned version of the registration electronically available. I could see if any of my colleagues are planning to go into the office soon and could check our paper files, as we were in the process of trying to scan all of our registration files before the pandemic hit, but it may be at the Federal Records Center, because it was not part of the boxes we had yet recalled for scanning. Let me know if you want me to see if someone can check our office files or if you have any other questions.

Thanks,

Claudia
